UNITED STATES PATENT OFFICE.

GEORGE ALFRED SQUIRE, OF BAYONNE, NEW JERSEY.

DESIGN FOR ORNAMENTATION OF A SEWING-MACHINE.

SPECIFICATION forming part of Design No. 15,220, dated August 5, 1884.

Application filed May 31, 1884. Term of patent 14 years.

To all whom it may concern:

Be it known that I, GEORGE ALFRED SQUIRE, a citizen of the United States, residing at Bayonne, in the county of Hudson and State of New Jersey, have invented and produced a new and original Design for the Ornamentation of Sewing-Machines, of which the following is a specification.

In the accompanying illustrations, Figures 1 and 2 are opposite views, in perspective, of a sewing-machine plate and arm ornamented with my new designs. Figs. 3 and 3* (one of which is a reversal or negative of the other) show the ornaments for the sides of the front end of the cloth-plate. Figs. 4 and 4* (one of which is a negative of the other) are the ornaments for the center of the sides of the cloth-plate; Figs. 5 and 6, the ornaments for the opposite sides of the rear end of the same, and Fig. 7 the ornament for the center thereof. Figs. 8 and 9 show the main ornaments for the opposite sides of the arm; Figs. 10, 11, 12, and 13, the ornaments for the post of the arm; Figs. 14 and 14*, the ornaments for the opposite sides of the forward part of the arm, and Figs. 15, 16, and 16* the ornaments for the upper side of the arm.

Groups A are the ornamentation for the sides of the cloth-plate near its forward end. These groups consist of a main flower resembling a dianthus, and a smaller flower resembling a buttercup, and interlaced stems bearing buds and slender pointed leaves.

B indicates groups for the ornamentation of the sides of the central part of the cloth-plate, these groups being much like groups A, excepting that they have a lesser number of stems, leaves, and buds.

C indicates a group for the ornamentation of the rear side of the back end of the cloth-plate, this group being much like groups A, only somewhat more curved and having a lesser number of buds than the latter.

D indicates a group for the ornamentation of the front side of the back end of the cloth-plate, this figure closely resembling groups B. It does not, however, contain a small spray of leaves attached near the base of the main stem shown in the latter groups.

Group E, which is the ornament for the cen-

ter of the cloth-plate, contains two large dianthus-like flowers, one buttercup-like flower, and intertwined outwardly-curved stems bearing numerous buds and small pointed leaves.

Group F, which is to ornament the front side of the arm near its base, consists of a forked buttercup-spray bearing two flowers.

Group G, which ornaments the rear side of the base of the arm, consists of a buttercup-spray with one large flower and two buds.

Group H, which is the main ornament for the front side of the arm, consists of a dianthus-like flower, intertwined sprays bearing buds, and a buttercup-like flower, one of the sprays extending into a word—in this case the word "Singer"—placed at the forward part of the group.

Group I, which is the main ornament for the rear side of the arm, is much like group H, excepting that the word is reversed.

Group J, which ornaments the sides of the forward end of the arm, consists of a small branch of buttercup with a single flower.

Group K, which ornaments the upper side of the arm, consists of a small branch of buttercup bearing three buds.

Group L, which ornaments the inner side of the post of the arm, is much like group K, excepting that it is somewhat larger, having more leaves.

Group M, which ornaments the face-plate, is much like group B, but is somewhat wider, having more leaves and buds.

Group N consists of words in German-text letters placed between two groups, K, on the upper side of the arm.

I claim—

1. The design for the ornamentation of sewing-machines, consisting of group A, substantially as shown.

2. The design for the ornamentation of sewing-machines, consisting of group B, substantially as shown.

3. The design for the ornamentation of sewing-machines, consisting of group C, substantially as shown.

4. The design for the ornamentation of sewing-machines, consisting of group D, substantially as shown.

5. The design for the ornamentation of sew-

(OVER)

ing-machines, consisting of group B, substantially as shown.

6. The design for the ornamentation of sewing-machines, consisting of group P, substantially as shown.

7. The design for the ornamentation of sewing-machines, consisting of group Q, substantially as shown.

8. The design for the ornamentation of sewing-machines, consisting of group R, substantially as shown.

9. The design for the ornamentation of sewing-machines, consisting of group S, substantially as shown.

10. The design for the ornamentation of sewing-machines, consisting of group T, substantially as shown.

11. The design for the ornamentation of sewing-machines, consisting of group U, substantially as shown.

12. The design for the ornamentation of sewing-machines, consisting of group V, substantially as shown.

13. The design for the ornamentation of sewing-machines, consisting of group W, substantially as shown.

14. The design for the ornamentation of sewing-

ing-machines, consisting of the combination of the groups A, B, C, D, and E, substantially as shown.

15. The design for the ornamentation of sewing-machines, consisting of the combination of groups H and J, substantially as shown.

16. The design for the ornamentation of sewing-machines, consisting of the combination of groups F, H, and J, substantially as shown.

17. The design for the ornamentation of sewing-machines, consisting of the combination of groups G, I, and J, substantially as shown.

18. The design for the ornamentation of sewing-machines, consisting of the combination of groups F, G, H, I, J, K, L, and M, substantially as shown.

19. The design for the ornamentation of sewing-machines, consisting of the combination of groups A, B, C, D, E, F, G, H, I, J, K, L, and M, substantially as shown.

In testimony whereof I affix my signature in presence of two witnesses.

GEORGE ALFRED SQUIRE.

Witnesses:

L. B. MILLER,

A. D. HARTWELL.
